### DETAILED ACTION

The disclosure is objected to because the legend "FIG. 1" should be included in the Brief Description of the Drawing:

The specification is objected to as failing to provide proper antecedent basis, in particular with reference to the underlined claimed subject matter, "vapor portion during a single evaporation stage and a contaminate portion", as it is not positively recited in the specification,. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o).

Claims 10, 13-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

a). The claims, as presented, provide for ambiguity and confusion as there appear to be two distinct statutory subject matter claimed in claim 10, i.e., system/apparatus and method/process.

b). There is no corresponding tie-in between the condenser and the distillate tank initially recited in the system that is included in the method steps.

Claims 10 and 13-17 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
